Good game that hopefully soon gets much better.. Great continuation of the Freedom Force story with the same great gameplay and humor. Great comic plot, this time with a World War 2 twist.. I will be playing more of this later. Reminds me of the game LYNE. but you're doing math instead. A good mind \u2665\u2665\u2665\u2665 type of game I can tell ya that since I was horrible in math when I was in school.. not a bad game buy when on sale. Eh, It feels like everyone joined the wrong region because literally everyone teleports like they were on 250 ping, other than that higher ranked people get way stronger equipment so that beginners pretty much get one to threeshotted whereas the beginners would need triple that to beat the high ranks.. Don't understand why this title is getting hated on so hard (worst game, worst expansion, etc). In a world of lootboxes, ingame purchases, and countless DLCs that offer way less content, this is actually quite a decent piece of story, albeit very short (3-6 hours of gameplay).

How on earth could anyone rate this lower than Gothic3: Forsaken Bugs is beyond me.

While a definite cash grab for a full price, If you liked original game, get it on sale and enjoy.. Old school concept executed very poorly....

- Buggy as heck (too many bugs to list)
- AI that lacks the "I"
- Annoying camera views (lots of attacks come from beyond your field of view)
- Save often because if you run out of energy\fuel then game over

If you get to use the 90% off coupon and buy this for 20 cents then you BARELY get your money's worth >.<. This is a very intriguing little visual novel. It is based around a man who has just been to his mother's funeral. Going to his old moping spot, he comes across a girl named Lily. They talk, but something feels a bit off...

There is only one choice in the game, both choices are tied to achievements you would receive upon completing the story after each one. Play through and find out the secrets behind Lily...

you have to re-level a new character every map, which completely removes the RPG element enjoyment, I can't actually see the point of this game. Not very random, not very good.. This one has better skins than CSGO. Free StatTrack included.. A cool but slightly tedious VR game. Perfect for showing off VR and for the first time playing its pretty scary.

A tl;dr before I head into a grey area where I try to hide spoilers but might give things away.

Great to show and scare people, it has some issues but VR-newbies probably wouldn't notice it (they become most apparent later in the game).

So, a bit less spoilery but still spoilery;

The game does have a lot of issues. You're like a midget in the room (I would have to reach at head level to interact with stuff on the sink, and I bet no one under 1,50m can actually reach the window).

There are also a lot of physics issues (having to grab a door multiple times to either open it or close it)(the chair becomes uninteractable after used)(the drawers can get stuck and buggy). Then there's the key half that really has some terrible issues (*spoiler*the second half just vanishes after it spawns and I have to rub the first half I have all over the place till it magically hatches onto the other part).

Then the last phase of the escape room is slightly tedious as you've been doing that puzzle already for the WHOLE game, only now you have to search for the objective all over the place while that broken chair can obscure your vision.

The flashlight is also pretty pointless. All in all a cool and terrifying escape room, but there are more props in the room than there are puzzles. Definitely enough entertainment value for the price though.. As of v0.5 (Alpha):

Fallen: A2P Protocol is a turn-based strategy game with RPG elements set in post-apocalyptic world.

If I would to compare it to existing games, I'd say it's a combination of Fallout with new XCOM.

Even though at the moment the game is in early alpha (not all mechanics are there, the game's very rough around the edges, some models are missing, textures are low-res, etc), you can pretty much already see what the game will be once it's done.

If you'd enjoyed a tactical gameplay of XCOM, you'll probably like the Fallen take on it.

It offers slightly different experience than XCOM because in addition to keeping your team alive, you also have to manage your limited resource - bullets and medkits do not magically refill on missions end here, you'll actually have to scavenge or trade to get those.

The RPG element comes into play with team management - all of your caravan members have levels, stats (that are raised automatically) and skills (that you have to assign on your own).

Skills are basically the way to specialize your team members into being a melee attacker, ranged assault, medic or some weird mix of all.

Since stats are leveled up automatically (at least in current builds), some characters are going to be more fit for some roles.

The game currently features a couple of pre-made story and side-missions. They have a pretty amusing dialogues, but a lot of things are not quite clear because of the obvious gaps in the storytelling. But that's something that'll come later for sure.

Downsides right now:

Since this is alpha, there's a lot of placeholders and things that are very rough around the edges

A lot of placeholders everywhere

UI is quite dodgy in places at the moment

Quite a lot of times UI does not properly communicates the stats (which is quite important for TBS in my opinion)

A lot of placeholders everywhere - most of the models are same (I wasn't joking before)

Some of the textures are quite low-res and can be painful to look at in high res

But all of those downsides are very much things in progress and will surely be fixed. If you can put those aside, you'll find a pretty fun (albeit raw) turn-based strategy experience.

If you think those are a bit too much for you, then wait a bit until beta.

You can watch a bit more in-depth look at the game here:

. Another example of early access gone wrong. I will admit I did have a lot of fun playing this one even with the bugs, but then the dev abandoned it and so I lost any hope of having a completed game to play.. things need to be added and fixed"

1.gameplay is very bad

-
- 2.give more camara views
 - 3.make the 11 players in game
 - 4.fixing the overlay
 - 5.add more national teams
 - 6.give option to change the player color and hair style in teams
 - 7.add fouls and panlties
 - 8.add regional cups like (African cup , Asian, Noorth Aferica, Europe, South America)
 - 9.give more kit option we can use from other teams and change colors
 - 10.have super shoots from outside the box. Pros

- + Cute and heatwarming characters
- + Beautiful scenary and graphics
- + Ambient music
- + Interesting story

Cons

- Short
- Unskipabble cutscenes (unless you're in Dev Mode)
- Controls not so suitable for keyboard & mouse
- Simple puzzle

Why it's recommended? Because it's fun and free.

. I wasn't expecting this to try to be a wacky comedy given the game's name, store page description, and subject matter involving a brutally murdered prostitute, and I think going in that direction was a mistake. The setting and graphics made me think of the two The Last Door games, which are strange games but play the dark subject matter straight and are far better games than this. This one goes from having an off tone to going completely off the rails towards the end with a transgender plotline that is totally out of place, plus, for good measure, a randomly inserted fight against racism, and then a confrontation with a crime boss who's a small child for no reason I could see. There are a couple times where your character has strange dreams with a talking fish. That tangent ends up going nowhere, and in retrospect just ends up seeming like an attempt to pad a story that's thin in this first act. Really not a lot happens storywise before the sudden ending on a cliffhanger.. EZ biiiiitch!!!!one!!
